

Ascella Technologies Capability Statement

Core Capabilities

Ascella Technologies, Inc. (Ascella), founded in 2002, is a Minority-Owned Small Business that delivers value-added services and technology-based solutions that generate significant results for federal government agencies. Ascella combines innovative technology and domain expertise to help agencies deliver exceptional customer experience and services with consistency and accountability.

Business Operations Optimization

Helping federal agencies optimize core operations to drive mission success. From project and product management to Agile services, our professionals assess, plan, and implement solutions that maximize efficiency. We leverage technology, including AI-enabled automation, to streamline processes and enhance operations.

Data and Analytics

Providing innovative data solutions that improve decision-making and outcomes. We build intuitive dashboards, visualizations, and reports that let users drill down into data. Our solutions enable organizations to uncover insights quickly and act with confidence.

Financial Management

Delivering knowledge of federal financial, budget, acquisition, and travel systems. Expertise includes CGI Momentum Suite and FFS, Oracle E-Business Suite, SAP PCM, and Microsoft Dynamics. We provide payroll, budgeting, and execution solutions to support federal operations.

Financial Regulatory Support

Partnering with federal regulatory agencies navigating today's financial landscape. Our experts bring deep skills in anti-money laundering, cryptocurrency analysis, and forensic accounting. We help clients stay ahead of regulations while maintaining compliance with evolving requirements.

Software Development and Cloud Services

Building innovative solutions with emerging technologies while sustaining mission-critical legacy applications. Our engineers support the full development lifecycle and cloud services. Using agile, iterative methods, we deliver value consistently and enable collaboration across stakeholders.
